

ONE OF THE BEST PLATFORM  
**FOR MONEY GROWTH**

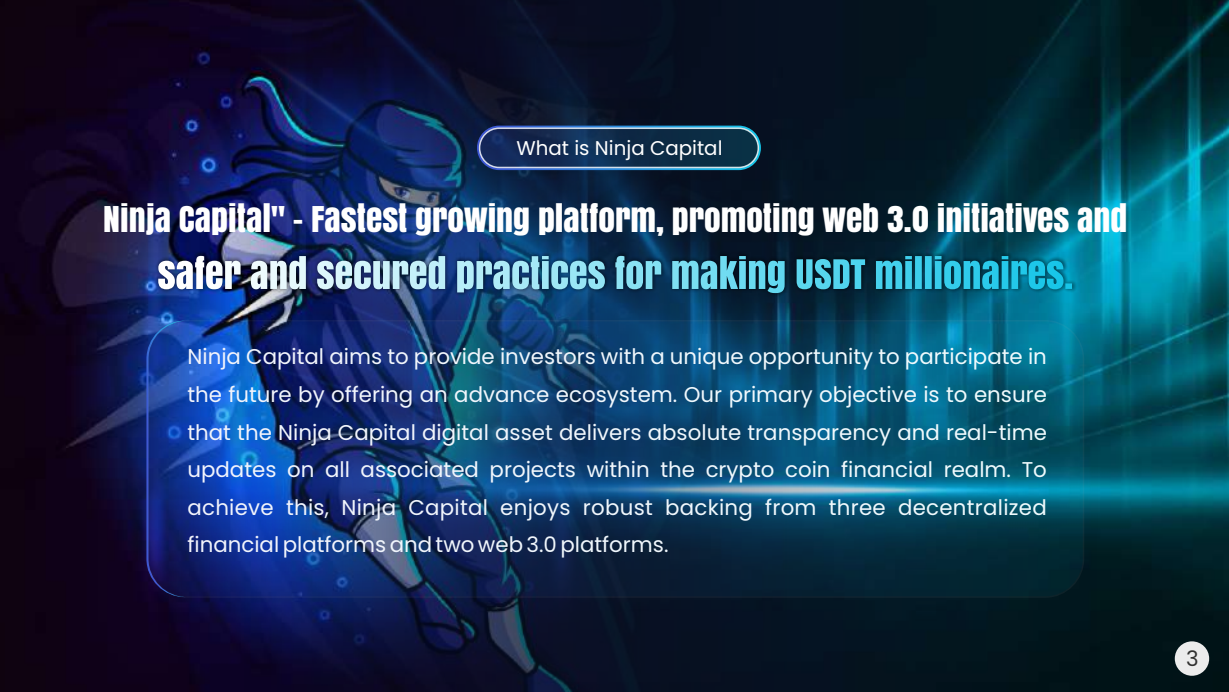

# Welcome To The NINJA Capital

blockchain based earning

Ninja Capital (VC) is a technology investment platform backing venture capital, growth equity, and buyout funds as well as entrepreneurs at the earliest stages. Ninja Capital presents an innovative web 3.0 ecosystem imposing crypto and crypto finance intelligence. This Cutting edge platform empowers the global community to leverage the USDT Holder ecosystem, securely storing their anticipated growth within personalized wallets, underpinned by distributed ledger computing. Furthermore, Ninja Capital is a programming based on BEP-20 network and deployed over Binance Blockchain. The system is 100% Transparent and decentralized.

What is Ninja Capital

## **Ninja Capital" - Fastest growing platform, promoting web 3.0 initiatives and safer and secured practices for making USDT millionaires.**

Ninja Capital aims to provide investors with a unique opportunity to participate in the future by offering an advance ecosystem. Our primary objective is to ensure that the Ninja Capital digital asset delivers absolute transparency and real-time updates on all associated projects within the crypto coin financial realm. To achieve this, Ninja Capital enjoys robust backing from three decentralized financial platforms and two web 3.0 platforms.

# NINJA Capital vision & Mission for endless future growth

———blockchain based earning

- Create a Revolution connecting to the world together
- Creating Ninja Capital Community decentralized community growth

Our vision is future oriented born in 2024 and sparked by the NINJA Capital ecosystem, but at present requiring a strong community to keep growing. The purpose of our project is to be used for everyday transactions both online and offline, making it an indispensable asset of human life as well as a very good investment asset that can offer some returns to its holders. The focus of our vision is to change the world, in areas of finance, medicine, smart contracts and transactions as well as other development sectors.

## Aave Protocol

Aave facilitates peer to peer lending through a smart contract enabled pool of crypto, where lenders can make deposit in exchange for interest payments and borrowers can take out loans in exchange for paying interest.

Depositer

Crypto Pool

Borrower

With smart contracts, users rely on a network of computer running AAVE and a series of algorithms to handle deals without having to may trust (or pay) any institution or person to take care of their funds.

## About Yield Farming & Our Partners

Yield farming earns "crypto interest" by locking your assets in DeFi platforms. You contribute to liquidity pools (think shared pot) used for trading and lending, gaining rewards like platform tokens.

R.G 01 - Major YF Partners for revenue generation

## Blockchain gaming & company's partner

Blockchain gaming is like a cool playground where you can win prizes (crypto!) for playing games, owning unique toys (NFTs!), and even helping make the rules. It's new and exciting, but remember, like any playground, there can be bumps and bruises!

R.G 02 - Major BG Partners for revenue generation

# About Blockchain energy & Partners

Decentralize renewable energy system with blockchain technology ,This technology is empowering households, businesses, and other energy producers and consumers to participate directly in the energy market, making it more sustainable and efficient blockchain technology is unlocking groundbreaking possibilities in peer-to-peer energy trading, fostering decentralized and transparent energy transactions. World Economic Forum identified over 65 current and emerging block-chain applications related to the environment.

- ⚙️ Wholesale energy distribution
- ⚙️ Gas and Energy Commodity Trading
- ⚙️ Electricity DATA management
- ⚙️ Utility Provider

Our blockchain energy companies Partners

**(Siemens, Iberdrola Group & LO 3 Energy)**

play very crucial role in economic growth of NINJA projects.

## About crypto mining & our partners

Our partners companies generate revenue from crypto mining by utilizing powerful computers to solve complex mathematical problems, validating and securing transactions on blockchain networks. As a reward for their computational efforts, miners receive newly minted cryptocurrencies and transaction fees. Revenue is generated through the sale of mined cryptocurrencies on exchanges or by holding them as investments. Additionally, some companies offer mining services to others, earning fees for providing computational power.

**Blockstream, BTCM, Hut 8 Mining, knc Miner & Cipher mining**  
are our mining partners list.

## How the work Crypto Mining Service providers (Brokers)?

Help buyers or sellers acquire or liquidate large volumes of used miners.

Lower new miner purchase prices by leveraging bulk orders and shipping logistic discounts.

Utilize the brokers network to find ideal hosting, raw power, and even financing for miners.
